Processor: Intel Dual-Core 2GHz or AMD Dual-Core 2GHz

Memory: 4 GB RAM

Storage: 1 GB available space

Sound Card: DirectX Compatible Sound Card with latest drivers

English

nazi shootout steam

I really don't know, I purchased this game just because it was 0.74 euros. It looks pretty nice for a 2D game and it's not boring like any other 2D's for me. The game tends to be buggy, like always, for example winning a battle and then getting back on the menu won't allow you to play the next day. Furthermore, finishing achievements won't even give you the achievements and I don't know why... It is really fun but needs a lot of work. Please fix it.. This is a highly underrated empire building space 4x game set in the Star Traders universe (like Templar Battleforce and Star Traders Frontiers). It features a well developed research tree and economic model. At the start of each game you select three factions to use in the game, each sporting unique characteristics. After that you take command of a migrant fleet which arrives in an uncharted space with an objective to gain control of the area and develop a functioning empire. To do that you have to colonise and build up new planets, control the political strife among the factions and fight xenos. I highly recommend this game to anyone who likes 4x games.. Worth every penny! One of the best rail shooters I've played. Super fun, super challenging! You have to quickly discern between bad guys, bombs, and innocent people in a fraction of a second. Collect Gold, buy upgrades, enable powerups, and look for extra bonus items!

Runs smooth and an ultra small download of about 140mb.

Love this game!

If it offends you, you probably suck on a pacifier and hug therapy dogs in college.. Remember that old flash game where you guide a missile down a tunnel and try to avoid crashing by flying through holes in the walls? This game is basically that. And that's fine! I like that kind of game. But the controls here kill it.

You fly through the holes in letters and avoid touching the letters themselves. While you're free to move wherever you want horizontally, there are only two vertical planes: top and bottom. So you can't fly through the center of the letter O; you have to fly around the upper or lower corners of it. So that takes getting used to.

But the WORST thing, by far, is the camera. The whole game is about lining up your block to make it through the empty spaces. But every time you move, no matter how small of a move it is, the camera violently whips around so you can't see straight. Imagine trying to thread a needle while shaking your head back and forth. It's nigh unplayable when you can't figure out where your block is going in a game about precision.

You know what would fix this ENTIRE game? Lock the camera behind the cube you control. That way you can actually see what's going on. The way this game is now, it's an unplayable mess.. Waste of money. I found the lack of instructions frustrating when I first played this game a few days back. But the new version released yesterday is a great improvement. I'm happy I contributed money to this game as the developer is clearly making progress. I look forward to seeing where it goes.. Shadow Blade contains some surprising and fascinating things to happen in an undeveloped action side-scroll game. This game is neat in every way. There's nothing in this underdev game I can call bad. It's got several difficulty levels, solid platforming, fun moves to play, and it's just a good experience altogether. I even didn't notice I played 85 minutes after my first try of the game ! So a good pick for its genre.

As a hardcore classic RPG gamer I enjoyed playing Shadow Blade and I rate it 8/10.. Physics: cornering and scrubbing needs fix. pro physics are challenging and nice; game is not arcade like in trailers. if they fix those this will be best mx game (its mx3 now).

-Graphics: a bit better than mx3. i never had performance problem with 1050ti. runs nice and smooth at ultra; with full ai race. also helmet cam is back! (from supercross)

-Sounds: best in series. especially in helm cam. you can hear stones and sands hitting your visor.

-AI: dont expect a lot. they will never race you like "dungey vs tomac". they wont take lines or overtakes.

. Having played a while I would say the gaming scene creates futuristic feeling and it sets up a lot of brain cell killing quzzles. Especially after game patched up with the latest attempt now it has optimised gaming experience dramatically and speeded up graphic card performance. I remain to enjoy fun out the VR perception and story. GOOD GAME!!

I don't believe this is a survival horror game. It was more of a help your friend get out of a dark random mine..

RECOMMENDATION: Garanteed a YES

A tiny gem within the STEAM game collection, a must have to collect yourself and experience it. It's fun over fun over fun! The gameplay is simple, but hardcore, you fail, there is no retry but the game just throws you another game type to overcome. No misusage of your coins, your coins won't complain at #MeToo if you buy this game!. This game is well made and quite beautiful. The art is amazing and captivating. The story is well made and given a lot of thought. So why can't I recommend this game? While many endings are available, they all left me feeling quite depressed with tears running down my face. That said, if you can get past this one hurdle, this game is for you. But for people like me who need a good ending that satisfies everything, you're money is best spent elsewhere.. Not very good, it's starts off looking promising when you're in the introduction area but soon goes downhill.

The textures are of yucky low quality, something you'd expect to see on mobile vr, not on a rift.

Soon into the experience you're on a helicopter flying through a cave with various iconic avaiation things floating in the cave, it was just ridiculous, not helped by the very low textures. Now I know it's about the history of flight, but it would have been better had it been set inside a museum and being sat on ride.

Once the ride ends, you're free to teleport along the sea looking at aviation history and reading about it, the reading was the most interesting part of this, the walking on sea was another silly idea, why the sea, why not make a museum, it all came across as cheap and half arsed effort imo, there were a couple of nice moments near the beginning but it was far outweighed with by all the negatives, quite disappointing, refunded.. Whopty woop we want more snoop whut. Controls feel great and the game is adorable. There's so much quirky humor and the music supports that mood. It can be suitable for a casual short gaming session but also taken seriously if one wants to get short run times and colleslct the apples.

Last but not least, there is so much extra content and customization. You can change the abilities of the characters and the 5 colors of the game can be changed by your will :). It says it in the Title. It's a Home Run Derby game. If you like the concept, you will enjoy this game. It's not a full baseball game and isn't meant to be.

Really fun to take turns with friends to try to beat each others scores.
