Encapsulated tungsten-hydrogen-nitrogen (W-H-N) and tungsten-hydrogen-nitrogen-boron (W-H-N-B) monometallic clusters were synthesized by laser ablation of metal-loaded tungsten microtubes. The geometric structures of the cluster anions were elucidated by combined experimental and theoretical studies. The W-H-N-B cluster anions were analyzed in terms of the topology of the hydrogen-doped clusters. It is shown that the W-H-N and W-H-N-B clusters anions are stabilized by the presence of large and compact rings that can be readily interpreted in terms of the W-H-N and W-H-N-B cluster structures in their electronic ground state, a distinction between conversion and other forms of actual fraud, we must consider the underlying purposes of the enactment of the provision in question. The Texas Supreme Court has stated that the purpose of the UCC is to replace the "common-law rules of liability" with "a simple, certain, and uniform set of rules to regulate commercial paper and commercial transactions." First Nat'l Bank in Dallas v. Whirlpool Corp., 517 S.W.2d 262, 265 (Tex. 1974). It further has stated that Article 4004 should be interpreted in a way that is most consistent with this purpose, and we must also keep in mind the context of the provision as set out in the section of the Code dealing with the rights of a holder in due course. Id. at 267. The first sentence of Section 4004.406 states that, in the case of a maker, a payee, or a drawer that has not paid the instrument, "acceptance of the instrument is final in favor of the holder." TEX. BUS. & COM.CODE ANN. § 4004.406 (Vernon Supp.2000). This first sentence thus deals with the rights of a holder who has already been paid. The second sentence 82157476af
